Customer Journey Map

Date	15 March 2026
Team ID	Rahul-DS633
Project Name	CrimeVision AI - Multimodal Crime Scene Reconstruction
Maximum Marks	2 Marks

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Ingestion & Upload	Stage 2: Multimodal AI Processing	Stage 3: 3D Review & Court Export
Actions What does the customer do?	• Selects evidence mode (Image/Audio/Video). • Drags and drops evidence files or selects benchmark presets. • Confirms file validation and initiates processing.	• Watches progress indicator as RT-DETR detects objects. • Reviews Whisper transcription of witness audio. • Observes 1Hz frame extraction and temporal alignment.	• Explores 3D interactive room canvas with mouse controls. • Interrogates AI Forensic Chatbot about timestamps. • Downloads SHA-256 verified Forensic PDF report.
Touchpoint What part of the service do they interact with?	• Modern Web UI Dashboard. • Drag & drop upload zone with format validation pill. • 'Start Processing' action trigger.	• Real-time processing spinner. • Live audio player & multilingual tabs. • CCTV surveillance video player & timeline table.	• Three.js WebGL 3D Canvas with OrbitControls. • AI Forensic Chatbot dialogue box. • ReportLab PDF download endpoint.
Customer Thought What is the customer thinking?	• 'Will this support standard security camera formats?' • 'Is the file transfer secure and private?' • 'I need this processed fast for today's briefing.'	• 'The AI caught the dropped knife in frame 00:12!' • 'The witness statement aligns exactly with CCTV time.' • 'The multilingual translation is surprisingly clear.'	• 'The 3D spatial layout makes line-of-sight obvious.' • 'This PDF report contains every citation needed for court.' • 'This saves our department 12 hours of manual work.'
Customer Feeling What is the customer feeling?	Cautious, focused, expectant.	Intrigued, impressed, relieved.	Empowered, authoritative, highly confident.
Process Ownership Who is in the lead on this?	Lead Forensic Evidence Technician	Autonomous CrimeVision AI Multimodal Inference Engine	Lead Case Detective & Senior Forensic Prosecutor
Opportunities How can we improve this stage?	• Add batch multi-file drag-and-drop. • Direct RTSP live surveillance stream support.	• GPU-accelerated parallel batch inference. • Dynamic audio noise isolation and voice separation.	• VR headset support for immersive courtroom jury walkthroughs. • Blockchain immutable evidence hashing.
