| **Date** | 18 October 2026 |
| **Team ID** | Rahul-DS633 |
| **Project Name** | CrimeVision AI - Intelligent Multimodal Crime Scene Reconstruction |
| **Maximum Marks** | 2 Marks |

## Target Persona: Senior Forensic Detective / Crime Scene Investigator

| | |
|---|---|
| **THINKS & FEELS**<br><br>• 'Did we overlook a concealed weapon in the shadows?'<br>• 'Will this digital evidence withstand cross-examination?'<br>• 'I wish I had an interactive 3D view to test line-of-sight.'<br>• Overwhelmed by gigabytes of raw CCTV and chaotic 911 calls. | **HEARS**<br><br>• Panicked eyewitnesses with overlapping voices on 911 tapes.<br>• Demands from prosecutors for fast evidence dossiers.<br>• Defense attorneys questioning timestamp discrepancies.<br>• Technicians recommending expensive 3D laser scanners. |
| **SAYS & DOES**<br><br>• 'We need a clear chronological breakdown of suspect entry.'<br>• Manually notes timestamps from video footage with pen and paper.<br>• Listens to recordings with headphones attempting translations.<br>• Takes dozens of 2D photos hoping they capture perspective. | **SEES**<br><br>• Complex, cluttered crime scenes with evidence tags.<br>• Low-resolution, grainy surveillance footage.<br>• Multiple monitor windows: VLC, photo viewer, Word.<br>• Intimidating backlog of cases awaiting judicial reporting. |
| **PAINS (Frustrations & Obstacles)**<br><br>• Siloed tools with zero automated cross-referencing.<br>• Hours wasted manually synthesizing timelines.<br>• Lack of 3D spatial depth in standard 2D photos.<br>• Language barriers causing lost leads during the golden hour. | **GAINS (Wants & Needs)**<br><br>• Instant unified multimodal timeline from CCTV + 911 audio.<br>• Interactive 3D spatial crime scene walkthrough inside browser.<br>• Automated, verifiable court-admissible PDF reports with SHA-256.<br>• Natural-language AI assistant for rapid evidence interrogation. |
