Code-Layout, Readability and Reusability

Date	18 October 2026
Team ID	Rahul-DS633
Project Name	CrimeVision AI - Intelligent Multimodal Crime Scene Reconstruction
Maximum Marks	5 Marks

Code Layout Checklist:

S. No	Code Quality Parameter	Description	Followed	Remarks
1	**Consistent Indentation**	Uniform spacing/tabs used throughout	**Yes**	PEP8 4-space in Python; 2-space standard in JS/CSS.
2	**Proper File Structure**	Files and folders logically organized	**Yes**	Clear separation: routes/, services/, utils/, frontend/js/.
3	**Meaningful Variable Names**	Variables reflect their purpose	**Yes**	Identifiers reflect exact semantics: session_id, box_normalized.
4	**Function / Method Names**	Functions are descriptively named	**Yes**	analyze_image(), extract_frames(), generate_forensic_pdf().
5	**Code Comments**	Inline & block comments explain logic	**Yes**	Docstrings detailing arguments/returns and 3D coordinate math.
6	**Modular Design**	Code split into reusable modules	**Yes**	Decoupled Flask Blueprints and dedicated ES6 classes.
7	**No Redundant Code**	Duplicate/unused code removed	**Yes**	Refactored routes; centralized API helper module in api.js.
8	**Error Handling**	Exceptions handled gracefully	**Yes**	Try-except blocks in all endpoints with synthetic fallbacks.

Reusable Components / Modules:

S. No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	**SessionStore (services/session_store.py)**	Python / JSON	Reused across Image, Audio, Video, Fusion, and PDF Generator.	**High**
2	**Scene3D (frontend/js/scene_3d.js)**	JavaScript / Three.js	Reused for 2D single-photo 3D rendering and complete multimodal scene.	**High**
3	**Timeline (frontend/js/timeline.js)**	JavaScript / DOM	Reused for rendering both Audio speech keypoints and CCTV video logs.	**High**
4	**ChatHandler (frontend/js/chat_handler.js)**	JavaScript / Fetch	Instantiated independently across Image Chat, Audio Chat, Video Chat.	**High**
5	**generate_forensic_pdf (pdf_service.py)**	Python / ReportLab	Reused for court report exports across all modalities and batch test harness.	**High**

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	**5 / 5**	Clean modular architecture adhering to Flask Blueprint and modern ES6 standards.

Readability	**5 / 5**	Consistent naming conventions, comprehensive docstrings, and inline comments.
Reusability	**5 / 5**	Decoupled services and parameterized frontend components highly adaptable.
Documentation / Comments	**5 / 5**	Exemplary code documentation with complete API contracts and test cases.
Overall Score	**5 / 5 (100%)**	**Production-Grade Code Quality verified with 0 syntax errors across 48 files.**
